

Ahead of Anticipated COVID Vaccine Approval in Europe, Holocaust Survivors Write to the EMA Demanding a Halt to the Vaccination Program

The survivors charge medical regulators with failing to accurately inform populations of vaccine dangers, calling the vaccination program a 'second holocaust'.

August 25 2021

Holocaust survivors and their descendants have today delivered a letter to the European Medicines Agency following the FDA's decision to grant full approval to new batches of Pfizer COVID-19 vaccines. The survivors charge authorities with failing to adequately inform populations of vaccine risks, violating the right to free informed consent under the Nuremberg Code.

The COVID-19 vaccines currently hold Conditional Marketing Authorisation in Europe and will remain in Phase 3 clinical trials until 2023.

The Holocaust survivors write, "Never before has immunization of the entire planet been accomplished by delivering a synthetic mRNA into the human body. It is a medical experiment to which the Nuremberg Code must be applied... We, the survivors of the atrocities committed against humanity during the Second World War... experience a déjà vu that is so horrifying that we rise to shield our fellow humans."

The authors list 22 serious adverse events that were known to the FDA prior to Emergency Use Authorization yet were not made known to the public, including vaccine-enhanced disease, stroke, myocarditis, acute multi-system inflammatory syndrome in children, Guillain-Barré syndrome, autoimmune conditions and pregnancy and birth outcomes.

According to Principle 6 of the Nuremberg Code, they write, "*The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved.*" They note that "'vaccination' against Covid has proven to be more dangerous than Covid for approximately 99% of all humans", adding that, "as documented by Johns Hopkins in a study of 48,000 children, children are at zero risk from the virus. Your own data shows that children, who are at no risk from the virus, have had heart attacks following vaccination; more than 15,000 have suffered adverse events – including more than 900 serious events. At least 16 adolescents have died following vaccination in the USA."

The signatories add that according to Principle 10 of the Code, medical experiments must be terminated whenever "*a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.*"

They further stress that vaccine mandates violate the right to voluntary consent under the Nuremberg Code "*without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion.*"

"If 80 years ago it was the Jews who were demonized as spreaders of infectious diseases, today it is the unvaccinated."

The authors, who include concentration camp survivors, their sons, daughters, and grandchildren, state, "It is obvious to us that another holocaust of greater magnitude is taking place before our eyes. The majority of the world's populace do not yet realize what is happening, for this kind of organized crime is beyond their scope of experience. We, however, know. Some of us have personal memories."

The letter is addressed to Mrs Emer Cooke, Executive Director of the European Medicines Agency and copied to Dr. Raimund Bruhin, Director of Swiss Medic in Switzerland, and Dr June Raine, Interim Chief Executive of the Medicines and Healthcare Products Regulatory Agency in the U.K.

The survivors conclude with a plea to Mrs Cooke for the true number of vaccine casualties, and ask, "how many will be enough to awaken your conscience?"

END
